

## Changing acoustic requirements demand flexible solutions

### Free space

Create your own acoustic profile, wherever and whenever required, with OWAacoustic® Free space absorbers. Free space upright units can be easily moved and placed wherever needed. They are ideal to separate meeting areas in offices, work spaces in call centers, and complement not only acoustics but also aesthetics in large open spaces and entry halls.

<b>Dimensions</b>	Free space 1: 1312 x 687 mm Free space 2: 1832 x 687 mm Free space 3: 1832 x 947 mm
<b>Thickness</b>	80 mm
<b>Surface cover</b>	Fabric on both sides
<b>Colours</b>	Red, blue-grey, light grey, yellow, green, dark blue
<b>Absorption</b>	$\alpha_w = 0.95 / \text{NRC} = 0.90$
<b>Absorption characteristic</b>	Broad band
<b>Fabric material class</b>	B1 according to DIN 4102
<b>Wear-resistant material</b>	90.000 martindale abrasion cycles
<b>Care instructions</b>	Washable to 60° C, iron cold, do not dry in tumble drier, no chemical cleaning

## Create conversation areas - acoustically and visually

OWAcoustic® Free space absorbers are covered with fabric on both sides and feature a slim aluminium frame. The fabric is available in six colours giving the partitioned conversation area a distinctive look. Of course, the front and back of the absorber can be covered in two different colours.

## Acoustic tools, right where you need them

The free standing units have excellent absorption characteristics. The frame profile has a continuous groove around its perimeter. This allows the unit to be placed either upright or sideways on the stand.
